I created a tax practice in 1982 and will use my business background to work on the following:

\$17,000,000,000,000 National Debt – I will work on measures to lower it before it's interest payments rise and smother our economy.

Jobs – How about creating income tax credits for businesses that purchase farm or office equipment that is at least 80% manufactured or assembled in the U.S.A.? It could help our manufacturing industries. I'll work with others to develop ideas that will help foster a better job environment.

Tax Reform and the Economy – My personal experience indicates that our tax code has been destroyed by special interest groups. It's currently too complex and causes you to spend too many hours working for the government. I will use my background in taxes to work with Congress to engineer a major tax overhaul which should help fuel our economy and create jobs.

Food – Our food labels should tell us if the food we are considering purchasing contains Genetically Modified Organisms.

Education - Will today's Common Core help or hurt our children?

Government size and Regulations – Reduce but not eliminate.

Constitution – This great work needs to be followed by all three branches of our Democratic Republic.

Abortion - Available for rape, incest, life of mother is in danger or child's health is severely harmed during pregnancy.

Religious Freedom - Currently under attack due to not well thought out legislation.

Legal and Illegal Immigration Reform - Large topic. Please see it at www.CarmelRon.com
