

Ballot Designation: Small Businessman

My parents immigrated from Iran. I was born and raised in California. My wife of over 16 years have two kids. We coach together kids soccer and I actively play soccer. I did volunteer for Search & Rescue with my EMT-1A license. I work concurrently in technology and real estate. Also worked as a freight locomotive engineer. I want to protect our environment from test projects. Moss Landing battery array already had four explosions contaminating our farmland and our community. Moisture along the coast and Li-Ion batteries don't mix well. Eight explosions just last year along the California coast shows the danger. Other topics are protecting girls sports, helping military veterans, protecting seniors who retire, build more housing without HOA's to increase supply (no free housing), education to ensure our kids are ready for supporting themselves and improve infrastructure (roads, highways). Businesses flourish and create jobs. Bring back programs for temporary Visa programs as needed in agriculture—legally. Government is not in the business to build, invent or create jobs. I will be boots on the ground to listen and work with the communities for solutions. Government created dependencies as I want to stop and break that habit. I won't stop solving one problem, but bring ideas and solutions that are sustainable while protecting everyone. Smaller government, less taxes—it's your life, your money, not anyone else.

I humbly ask for your vote to represent We The People together as a community and nation. Today Decides Tomorrow.

Endorsements: Monterey County Republican Assembly
 San Luis Obispo County Republicans.
