Your family's struggles and safety are always on my mind. As taxpayers and ratepayers, merely surviving instead of thriving due to unsatisfactory performance of our county's utility providers, you deserve a Supervisor who has the business acumen of (high-tech) to address your diminished lifestyle. My priorities in this period of critical economic recovery are to support our common goods such as childcare, access to healthcare and mental wellness, affordable housing, income equity, opioid programs, climate preparedness, and environmental sustainability to align our county budget to support our community values. The shift to these priorities and a laser focus on accountability will improve the quality of your life.

My resilience is proven. I've been elected to public office governing boards of education over 3 consecutive terms and through the State of Emergency providing direction and oversight. I serve on several (2023-2024) committees: (Legislative Action), (Strong Start (0-8) years old) and (Environmental Literacy).

I left my Indiana home seeking opportunity in California, and I found it. I love living among the redwoods and paddling in the ocean.
