

BOB FULTZ

Candidate for San Lorenzo Valley Water District Director

Elected Incumbent (831) 338-4650 bob.fultz@pacbell.net www.bobfultz.com Age: 65

Voters elected me to the board in 2018 on a platform of change. Since then I've led and supported over 30 strategic and positive changes in District policies to better position us for the future. Now, our focus must be on sustainable and methodical infrastructure improvements, including CZU recovery. This requires robust and transparent financial planning, including grant funding and operating efficiencies—critical given current economic conditions.

A rate increase proposal is coming soon, likely post-election. My position is simple—the community shouldn't consider any rate increase without a transparent and detailed financial plan for the funds. While promoted for infrastructure, 2/3 of the money raised by the last two rate increases weren't applied to that goal.

I support our district consolidating with the Big Basin Water community who urgently need water security. I oppose any proposal to consolidate with Scotts Valley Water District, which is, unfortunately, not permanently off the table.

I'm CFO of a Silicon Valley company (since acquired), with two engineering degrees and an MBA. I've lived in BoulderCreek for 35 years, serving in several volunteer roles for local organizations. I'm the longest-serving Director, serving on the Engineering Committee focused on CZU rebuilding and infrastructure. Thank you for your continued support and vote.
