

I am a husband, and father of two children in our current school district. I see things that can be improved and that is what is driving me to run for school board. I look forward to work with the board to implement changes for improvement of our educational system. I have seen families make decisions to move to private schools. It is key to improve our public schools to be as competitive as private school or better. Competition leads to improvement. Give parents a choice, not make a decision between public and private schools. Key points are to create solutions for everyone. One point is to leave boys and girls bathrooms alone. Create another bathroom for non-gender specific (this term may be different) instead of opening up the girls bathroom for others. Another key point is teaching financial education. This is important for our kids to have an understanding of finances and become successful in life.

Sincerely,

Tuka Gafari
