

I am seeking to serve on the Cabrillo Community College District's Governing Board representing Area 6 because I believe community colleges are among our most powerful engines of opportunity. They open doors to education, meaningful careers, and economic mobility while strengthening the communities they serve.

For more than three decades, I have worked at the intersection of education, workforce development, and economic opportunity. Throughout my career, I have partnered with educational partners, employers, workforce boards, public agencies, and nonprofit organizations to build education-to-work pathways that help individuals gain the skills, support, and confidence needed to succeed in the job market. This experience has given me a deep appreciation for the critical role community colleges play in preparing students for both lifelong learning and meaningful careers.

I would bring to the Board executive leadership experience, a collaborative approach, and a commitment to thoughtful governance, fiscal responsibility, and equitable student success. I value listening to diverse perspectives, asking good questions, and making decisions that serve the long-term interests of students and the community.

It would be an honor to contribute my experience, community partnerships, and passion for expanding opportunity in support of Cabrillo Community College's mission and future.
