age 52

As your Trustee, I have spent nearly two years delivering measurable results by making difficult decisions.

I championed increased student achievement by leading the introduction of a back-to-basics math program and the nationally successful LETRS reading program from which our students are already seeing dramatic reading gains. To maintain local control of your schools and protect them from a threatened, destructive state takeover, I helped close the structural deficit by controlling costs.

I have advocated consistently for effective special education, mental health services, athletics, art, theater, and music programs, partnering with community organizations to fill budget gaps. I will not stop fighting for our students and our community.

My priorities: high academic expectations for every student, schools that are safe, supporting teachers, minimizing screens in the classroom, and making certain every student is career and/or college ready. I am an emergency medicine physician, a long-term homeowner, and a proud parent with two student-athletes in your PVUSD schools.

I have worked hard to do what I said I would do when I joined the board. I am committed to finishing the job with continued transparency. I humbly ask for your vote.
