

I am running for Watsonville City Council because this community is home. My wife and I have been raising our children here, and we are deeply invested in Watsonville's future. As an Operations Manager overseeing multi-site facilities, I have a proven record of leading teams and bringing a practical, results-oriented approach to leadership.

My priorities are enhancing public safety, maintaining our neighborhood infrastructure, and strengthening our local economy. I understand the importance of stretching budgets and managing resources efficiently, skills I use daily in my work.

Watsonville must be a city where families feel safe, children can thrive, and small businesses are supported. Growth requires proactive collaboration with city staff, business owners, and residents to create jobs and expand opportunity.

I believe City Hall must be transparent, fiscally accountable, and responsive to the working-class families that keep our community running. I am committed to listening to your concerns and delivering the practical leadership Watsonville deserves.

Together, we can build a safer, more prosperous future for all our residents. I would be honored to have your vote.
